

Shantanu Chandra

AI Transformation Leader

shantanu.msp@gmail.com (mailto:shantanu.msp@gmail.com)

[linkedin.com/in/chandrashantanu](https://www.linkedin.com/in/chandrashantanu/) (https://www.linkedin.com/in/chandrashantanu/)

AI product and transformation leader with 12+ years across retail, lending, AdTech, SaaS and enterprise software, including five years building and launching AI products. I connect product judgment, operating design, evaluation, governance and adoption to turn useful signals into measurable systems at scale.

CAREER EXPERIENCE

Lenskart

AI Product Lead

Nov 2025–Present

Reports to a co-founder; works with three AI engineers, two ML engineers and one DevOps engineer.

Selected three of 10 AI use cases for delivery, launched the eye-test and recruiting products, and moved Marketing Intelligence into pilot.

Launched a Hindi and English voice-guided eye test in 200 stores. Across 1,000 controlled and 1,000 live-store tests, 95% of results agreed with a licensed optometrist's prescription within accepted industry tolerance; an optometrist approved every final prescription.

Made on-device intent detection three times faster and cut recruiter sourcing and interest checks from about eight weeks to one across 300 candidates, with recruiters retaining calls, emails and final decisions.

IIFL Home Loans

AVP / Lead Product Manager

May 2024–Oct 2025

Managed six product managers and led 25 engineers and data scientists across three squads.

Integrated credit bureau, KYC and Account Aggregator services into an app handling about one million onboardings a month; employed-customer onboarding and approval moved from one week to 20 minutes.

Piloted a RAG policy assistant with 2,000 field-sales employees. Of about 100 weekly questions, 80% cleared a 95% confidence threshold; remaining questions went to policy specialists.

Kept customer communications and collections actions behind human approval and an audit trail, with KYC and anti-money-laundering checks aligned to RBI and NHB requirements.

AGL (Hakuhodo)

Senior Product Manager, AdTech

Sep 2023–Apr 2024

Mentored two product managers; worked across five commerce platforms and two national FMCG clients.

Led automation of budgets, bids, campaign rules, inventory checks and reporting, reducing manual campaign work by 70% and new-client onboarding from several months to one week.

During the eight-month rollout, the platform reached 50% adoption among eligible users in one quarter, while managed-campaign ROAS rose from 1.3× to 1.7×, a 31% increase.

Builder.ai

Senior Product Manager, Conversational AI

Dec 2020–Aug 2023

Led four product managers, two designers and 14 engineers and data scientists across five product squads.

- Led customer interviews, beta programmes, product demos and sales enablement for a conversational planning product, reaching 90% adoption among 150 customer-success managers.
- Introduced consistent intent labels, training-data review and model-evaluation standards.
- A freemium offer increased completed monthly onboardings from 50 to 25,000 in six months; 12,500 users bought at least one month of service in month six.

Earlier career

NUiO

Product Manager, Salesforce Consulting · Mar–Dec 2020

Pantheon

Product Analyst · Jul 2019–Mar 2020. Built an SQL, Excel and VBA database-migration testing tool, reducing test execution time by more than 75%.

Covalent Softwares

Manager, Sales & Support · Oct 2016–Aug 2017

Toshiba Softwares

Software Engineer · Aug 2013–Sep 2016

Independent products

WasabiTravels

Built and launched a Japan itinerary planner using more than 2,000 curated places to suggest routes and check whether each day's plan is practical.

Card Compass · Case study only

Built a credit-card discovery product using spending patterns and reward rules; it attracted 121 early-access requests. The current public destination is the portfolio case study only.
